

MEI Introduction to Data Science

Lesson 4: Data presentation/visualisation

Activity 2: Time series graphs

This activity explores whether the changes in life expectancy since 1991 been similar for different regions of England and different boroughs of London.

Checkpoint 1

Have the changes in life expectancy since 1991 been similar for different regions of England?

Which of the five London boroughs listed (Bexley, Camden, Croydon, Haringey and Islington) demonstrated the biggest change in life expectancy?

Was the change in life expectancy in these boroughs similar for males and females?
