AS GCE MATHEMATICS (MEI)

4752/01 Concepts for Advanced Mathematics (C2)

QUESTION PAPER

3267480787

Candidates answer on the Printed Answer Book.

OCR supplied materials:
- Printed Answer Book 4752/01
- MEI Examination Formulae and Tables (MF2)

Other materials required:
- Scientific or graphical calculator

Duration: 1 hour 30 minutes

INSTRUCTIONS TO CANDIDATES

These instructions are the same on the Printed Answer Book and the Question Paper.

- The Question Paper will be found inside the Printed Answer Book.
- Write your name, centre number and candidate number in the spaces provided on the Printed Answer Book. Please write clearly and in capital letters.
- **Write your answer to each question in the space provided in the Printed Answer Book.** Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Answer **all** the questions.
- Do **not** write in the bar codes.
- You are permitted to use a scientific or graphical calculator in this paper.
- Final answers should be given to a degree of accuracy appropriate to the context.

INFORMATION FOR CANDIDATES

This information is the same on the Printed Answer Book and the Question Paper.

- The number of marks is given in brackets **[ ]** at the end of each question or part question on the Question Paper.
- You are advised that an answer may receive **no marks** unless you show sufficient detail of the working to indicate that a correct method is being used.
- The total number of marks for this paper is **72**.
- The Printed Answer Book consists of **12** pages. The Question Paper consists of **4** pages. Any blank pages are indicated.

INSTRUCTION TO EXAMS OFFICER / INVIGILATOR

- Do not send this Question Paper for marking; it should be retained in the centre or recycled. Please contact OCR Copyright should you wish to re-use this document.

Section A (36 marks)

1 **(i)** Differentiate $12\sqrt[3]{x}$. **[2]**

(ii) Integrate $\frac{6}{x^3}$. **[3]**

2 A sequence is defined by $u_1 = 2$ and $u_{k+1} = \frac{10}{u_k^2}$.

Calculate $\sum_{k=1}^{4} u_k$. **[3]**

3 An arithmetic progression has tenth term 11.1 and fiftieth term 7.1. Find the first term and the common difference. Find also the sum of the first fifty terms of the progression. **[5]**

4 A sector of a circle has angle 1.5 radians and area $27\,\text{cm}^2$. Find the perimeter of the sector. **[4]**

5 Use calculus to find the set of values of x for which $x^3 - 6x$ is an increasing function. **[5]**

6 **(i)** On the same axes, sketch the curves $y = 3^x$ and $y = 3^{2x}$, identifying clearly which is which. **[3]**

(ii) Given that $3^{2x} = 729$, find in either order the values of 3^x and x. **[2]**

7 Show that the equation $\sin^2 x = 3\cos x - 2$ can be expressed as a quadratic equation in $\cos x$ and hence solve the equation for values of x between 0 and 2π. **[5]**

8 Fig. 8 shows the graph of $\log_{10} y$ against $\log_{10} x$. It is a straight line passing through the points $(2, 8)$ and $(0, 2)$.

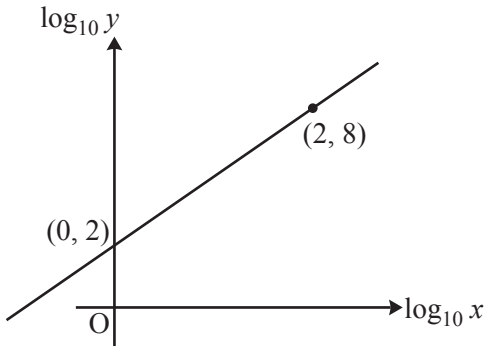

Fig. 8

Find the equation relating $\log_{10} y$ and $\log_{10} x$ and hence find the equation relating y and x. **[4]**

Section B (36 marks)

9

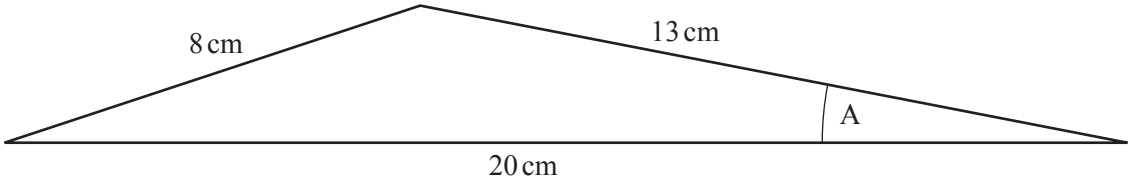

Fig. 9.1

(i) Jean is designing a model aeroplane. Fig. 9.1 shows her first sketch of the wing's cross-section. Calculate angle A and the area of the cross-section. **[5]**

(ii) Jean then modifies her design for the wing. Fig. 9.2 shows the new cross-section, with 1 unit for each of x and y representing one centimetre.

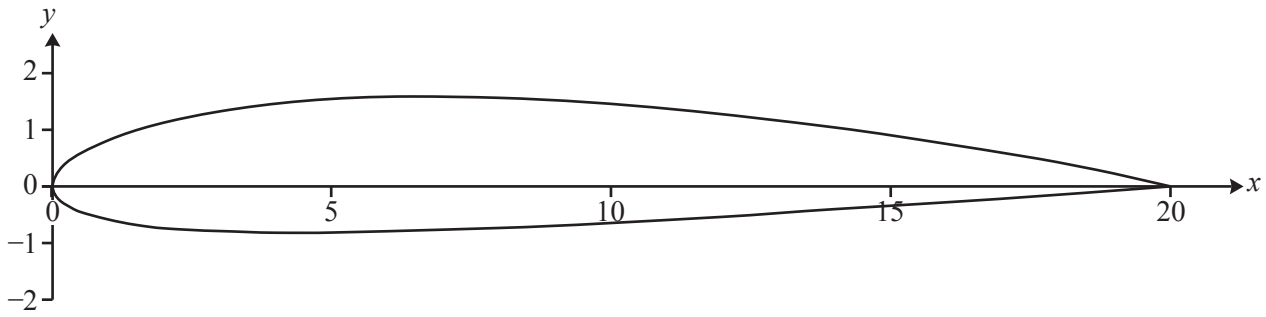

Fig. 9.2

Here are some of the coordinates that Jean used to draw the new cross-section.

Upper surface		Lower surface	
x	y	x	y
0	0	0	0
4	1.45	4	−0.85
8	1.56	8	−0.76
12	1.27	12	−0.55
16	1.04	16	−0.30
20	0	20	0

Use the trapezium rule with trapezia of width 4 cm to calculate an estimate of the area of this cross-section. **[6]**

10 The gradient of a curve is given by $\frac{dy}{dx} = 4x + 3$. The curve passes through the point $(2, 9)$.

(i) Find the equation of the tangent to the curve at the point $(2, 9)$. **[3]**

(ii) Find the equation of the curve and the coordinates of its points of intersection with the x-axis. Find also the coordinates of the minimum point of this curve. **[7]**

(iii) Find the equation of the curve after it has been stretched parallel to the x-axis with scale factor $\frac{1}{2}$. Write down the coordinates of the minimum point of the transformed curve. **[3]**

11 Jill has 3 daughters and no sons. They are generation 1 of Jill's descendants.

Each of her daughters has 3 daughters and no sons. Jill's 9 granddaughters are generation 2 of her descendants. Each of her granddaughters has 3 daughters and no sons; they are descendant generation 3.

Jill decides to investigate what would happen if this pattern continues, with each descendant having 3 daughters and no sons.

(i) How many of Jill's descendants would there be in generation 8? **[2]**

(ii) How many of Jill's descendants would there be altogether in the first 15 generations? **[3]**

(iii) After n generations, Jill would have over a million descendants altogether. Show that n satisfies the inequality

$$n > \frac{\log_{10} 2000003}{\log_{10} 3} - 1.$$

Hence find the least possible value of n. **[4]**

(iv) How many **fewer** descendants would Jill have altogether in 15 generations if instead of having 3 daughters, she and each subsequent descendant has 2 daughters? **[3]**

Annotations and abbreviations

Annotation in scoris	**Meaning**
✓and ✗	
BOD	Benefit of doubt
FT	Follow through
ISW	Ignore subsequent working
M0, M1	Method mark awarded 0, 1
A0, A1	Accuracy mark awarded 0, 1
B0, B1	Independent mark awarded 0, 1
SC	Special case
^	Omission sign
MR	Misread
Highlighting	
Other abbreviations in mark scheme	**Meaning**
E1	Mark for explaining
U1	Mark for correct units
G1	Mark for a correct feature on a graph
M1 dep*	Method mark dependent on a previous mark, indicated by *
cao	Correct answer only
oe	Or equivalent
rot	Rounded or truncated
soi	Seen or implied
www	Without wrong working

Subject-specific Marking Instructions for GCE Mathematics (MEI) Pure strand

a Annotations should be used whenever appropriate during your marking.

The A, M and B annotations must be used on your standardisation scripts for responses that are not awarded either 0 or full marks. It is vital that you annotate standardisation scripts fully to show how the marks have been awarded.

For subsequent marking you must make it clear how you have arrived at the mark you have awarded.

b An element of professional judgement is required in the marking of any written paper. Remember that the mark scheme is designed to assist in marking incorrect solutions. Correct *solutions* leading to correct answers are awarded full marks but work must not be judged on the answer alone, and answers that are given in the question, especially, must be validly obtained; key steps in the working must always be looked at and anything unfamiliar must be investigated thoroughly.

Correct but unfamiliar or unexpected methods are often signalled by a correct result following an *apparently* incorrect method. Such work must be carefully assessed. When a candidate adopts a method which does not correspond to the mark scheme, award marks according to the spirit of the basic scheme; if you are in any doubt whatsoever (especially if several marks or candidates are involved) you should contact your Team Leader.

c The following types of marks are available.

M
A suitable method has been selected and *applied* in a manner which shows that the method is essentially understood. Method marks are not usually lost for numerical errors, algebraic slips or errors in units. However, it is not usually sufficient for a candidate just to indicate an intention of using some method or just to quote a formula; the formula or idea must be applied to the specific problem in hand, eg by substituting the relevant quantities into the formula. In some cases the nature of the errors allowed for the award of an M mark may be specified.

A
Accuracy mark, awarded for a correct answer or intermediate step correctly obtained. Accuracy marks cannot be given unless the associated Method mark is earned (or implied). Therefore M0 A1 cannot ever be awarded.

B
Mark for a correct result or statement independent of Method marks.

E

A given result is to be established or a result has to be explained. This usually requires more working or explanation than the establishment of an unknown result.

Unless otherwise indicated, marks once gained cannot subsequently be lost, eg wrong working following a correct form of answer is ignored. Sometimes this is reinforced in the mark scheme by the abbreviation isw. However, this would not apply to a case where a candidate passes through the correct answer as part of a wrong argument.

d When a part of a question has two or more 'method' steps, the M marks are in principle independent unless the scheme specifically says otherwise; and similarly where there are several B marks allocated. (The notation 'dep *' is used to indicate that a particular mark is dependent on an earlier, asterisked, mark in the scheme.) Of course, in practice it may happen that when a candidate has once gone wrong in a part of a question, the work from there on is worthless so that no more marks can sensibly be given. On the other hand, when two or more steps are successfully run together by the candidate, the earlier marks are implied and full credit must be given.

e The abbreviation ft implies that the A or B mark indicated is allowed for work correctly following on from previously incorrect results. Otherwise, A and B marks are given for correct work only — differences in notation are of course permitted. A (accuracy) marks are not given for answers obtained from incorrect working. When A or B marks are awarded for work at an intermediate stage of a solution, there may be various alternatives that are equally acceptable. In such cases, exactly what is acceptable will be detailed in the mark scheme rationale. If this is not the case please consult your Team Leader.

Sometimes the answer to one part of a question is used in a later part of the same question. In this case, A marks will often be 'follow through'. In such cases you must ensure that you refer back to the answer of the previous part question even if this is not shown within the image zone. You may find it easier to mark follow through questions candidate-by-candidate rather than question-by-question.

f Wrong or missing units in an answer should not lead to the loss of a mark unless the scheme specifically indicates otherwise. Candidates are expected to give numerical answers to an appropriate degree of accuracy, with 3 significant figures often being the norm. Small variations in the degree of accuracy to which an answer is given (e.g. 2 or 4 significant figures where 3 is expected) should not normally be penalised, while answers which are grossly over- or under-specified should normally result in the loss of a mark. The situation regarding any particular cases where the accuracy of the answer may be a marking issue should be detailed in the mark scheme rationale. If in doubt, contact your Team Leader.

g Rules for replaced work

If a candidate attempts a question more than once, and indicates which attempt he/she wishes to be marked, then examiners should do as the candidate requests.

If there are two or more attempts at a question which have not been crossed out, examiners should mark what appears to be the last (complete) attempt and ignore the others.

NB Follow these maths-specific instructions rather than those in the assessor handbook.

h For a *genuine* misreading (of numbers or symbols) which is such that the object and the difficulty of the question remain unaltered, mark according to the scheme but following through from the candidate's data. A penalty is then applied; 1 mark is generally appropriate, though this may differ for some units. This is achieved by withholding one A mark in the question.

Note that a miscopy of the candidate's own working is not a misread but an accuracy error.

Question			Answer	Marks	Guidance	
1	(i)		$kx^{\frac{1}{3}-1}$ oe $4x^{\frac{-2}{3}}$ isw cao	**M1** **A1** **[2]**	k is any non-zero constant ignore + c	 allow any equivalent exact simplified form
1	(ii)		kx^{-3+1} oe $-3x^{-2}$ isw $+ c$	**M1** **A1** **A1** **[3]**	k is any non-zero constant	 allow any equivalent exact simplified form
2			$u_2 = \frac{10}{2^2}, u_3 = \frac{10}{\text{their } 2.5^2}, u_4 = \frac{10}{\text{their } 1.6^2}$ isw $2 + u_2 + u_3 + u_4$ soi 10.00625 or $\frac{1601}{160}$ or $10\frac{1}{80}$ cao isw	**M1*** **M1dep*** **A1** **[3]**	 must be the sum of 4 terms only **B3** if unsupported	NB 2.5, 1.6, 3.90625 or $\frac{10}{4}, \frac{8}{5}, \frac{125}{32}$ may be implied by eg sight of 3.9 and answer of 10.0 NB 2.5, 1.1, 0.625 scores **M0M0**

3			$a + (10 - 1)d = 11.1$ and $a + (50 - 1)d = 7.1$	**M1**	may be implied by $40d = \pm 4$ or embedded in attempt to solve	condone one slip in coefficient of d
			$d = -0.1$	**A1**	if unsupported, **B2** for one of these and **B3** for both	
			$a = 12$	**A1**		
			$\frac{1}{2} \times 50(\textit{their } a + 7.1)$ with $a > 11.1$	**M1**	or $\frac{50}{2}(2a + (50-1)d)$ with $a > 11.1$ and $d < 0$	
			477.5 or 477½ or $\frac{955}{2}$ cao	**A1**		if **M0**, **B2** for any form of correct answer www
				[5]		
4			$27 = ½ r^2 \times 1.5$ oe	**M1**	or $27 = \frac{85.943669...}{360} \times \pi r^2$	angle in degrees rounded to 2 sf or more
			$r = 6$ soi	**A1**	may be embedded in formula for arc length	may be implied by later work eg 9 or 21
			their $r \times 1.5$	**M1**	or their $\frac{85.943639}{360} \times 2\pi \times$ their r	if r is incorrect, we must **see** their $r \times 1.5$ [$+ 2r$] for **M1** if r is correct, **M1** may be implied by 9 or 21
			21 [cm] cao	**A1**	allow full marks for recovery from working with rounded value of θ in degree form	**B4** for 21 unsupported www
				[4]		

5			$3x^2 - 6$ seen	**B1**		
			their $y' = 0$ or $y' > 0$ or $y' \geq 0$	**M1**	must be quadratic with at least one of only two terms correct	
			$\sqrt{2}$ and $-\sqrt{2}$ identified	**A1**	may be implied by use with inequalities or by ±1.41[4213562] to 3 sf or more	$\lvert x\rvert = \sqrt{2}$ implies **A1**
			$x < -\sqrt{2}$ or $x \leq -\sqrt{2}$ isw	**A1**	if **A1A0A0**, allow **SC1** for fully correct answer in decimal form to 3 sf or more	NB **just** $-\sqrt{2} > x > \sqrt{2}$ or $\sqrt{2} < x < -\sqrt{2}$ or $x > \pm\sqrt{2}$ implies the first **A1** then **A0A0**
			$x > \sqrt{2}$ or $x \geq \sqrt{2}$	**A1**	or **A2** for $\lvert x\rvert > \sqrt{2}$ or $\lvert x\rvert \geq \sqrt{2}$	
				[5]		
6	**(i)**		both curves with positive gradients in 1st and 2nd quadrants; ignore labels for this mark	**M1**	do not award if clearly not exponential shape; condone touching negative x-axis but not crossing it	consider each curve independently; ignore scales and points apart from $(0, 1)$
			both through $(0, 1)$	**A1**		allow if indicated in table of values or commentary if not marked on graph
			$y = 3^{2x}$ above $y = 3^x$ in first quadrant and below it in second	**A1**	must be clearly labelled, **A0** if wrongly attributed or if coincide for negative x from $(0, 1)$	if **M0** allow **SC1** for one graph fully correct
				[3]		
6	**(ii)**		$x = 3$	**B1**	**B0** if wrongly attributed	
			$3^x = 27$	**B1**	**B0** if wrongly attributed	allow $3^3 = 27$ with $x = 3$ stated
				[2]		

7			$1 - \cos^2 x = 3\cos x - 2$ oe	**M1***		
			$\cos^2 x + 3\cos x - 3$ [= 0]	**M1*dep**	or $-\cos^2 x - 3\cos x + 3 = 0$	condone one sign error *or* constant term of -1 (in LH version) or $+1$ (in RH version)
			$\cos x =$ their $\frac{-3+\sqrt{21}}{2}$ or $\cos x =$ their 0.79 to 0.7913 soi	**M1**	dependent on award of previous method mark, must be correct for their quadratic	ignore other values (eg –3.79...); condone recovery from $x = 0.791287847\ldots$ but **M0** if no recovery
			[x =] 0.6578 to 0.66 isw cao	**A1**	**A0** for eg 0.66π if 0.66 not seen separately	NB $x = 0.65788395\ldots$
			[x =] 5.625 to 5.63 isw cao	**A1**	if **A1A1** extra values in range incur a penalty of 1; ignore extra values outside range	NB $x = 5.625301357\ldots$
					if **A0A0** allow **SC1** for 37.69 to 37.7° *and* 322 to 322.31° *or* for $(0.209 \text{ to } 0.21)\pi$ *and* $(1.79 \text{ to } 1.791)\pi$	no **SC** mark available if extra values in range
				[5]		
8			$m = 3$ seen	**B1**		
			$\log y = m\log x + 2$ or $\log y = m\log x + \log 100$	**M1**	or $\log y - 8 = m(\log x - 2)$	condone lack of base; "$c = 2$" is insufficient
			$\log y = \log x^3 + 2$ or $\log y = \log x^3 + \log 100$ or better	**M1**	or $10^{\log y} = 10^{3\log x + 2}$ or $10^{3\log x + \log 100}$ or better	condone lack of base, but not bases other than 10 unless fully recovered
			$y = 100x^3$ or $y = 10^{3\log x + 2}$ or $y = 10^{\log x^3 + 2}$ www isw	**A1**	$y = 10^{3\log x + \log 100}$ or $y = 10^{\log x^3 + \log 100}$	
				[4]		

9	**(i)**		$[\cos A =]\frac{20^2+13^2-8^2}{2\times13\times20}$	**M1***	or $8^2 = 20^2+13^2-2\times13\times20\times\cos A$	
			$[\cos A =]\frac{505}{520}$ oe soi	**A1**	or 0.971 to 0.9712	
			$A =$ 13.79 to 13.8° or 14°	**A1**	or 0.24077 to 0.241 or 0.24 (radians); allow **B3** if given to 3sf or more unsupported	or 15.32 (grad)
			[Area =] ½ × 20 × 13 × sin *their A*	**M1dep***	or **M1** for eg ½ × 20 × 8 × sin 22.8, as long as angle calculated correctly from their A (other angles are 22.79824…° and 143.40645..° or 36.59355..°)	or $\sqrt{\frac{41}{2}(\frac{41}{2}-8)(\frac{41}{2}-13)(\frac{41}{2}-20)}$ NB $13\sin A = 3.099899192$ if ½×b×h used
			30.99 to 31.01 isw	**A1**	allow **B2** for unsupported answer within range	
			or $\frac{5\sqrt{615}}{4}$ oe isw	**[5]**		

9	**(ii)**		$h = 4$ soi	**B1**		
			$\frac{\text{their } 4}{2} \times (0 + 0 + 2(1.45+1.56+1.27+1.04))$ *or* $\frac{\text{their } 4}{2} \times (0 + 0 + 2(\pm 0.85 \pm 0.76 \pm 0.55 \pm 0.30))$	**M1***	shape of formula correct with 2, 3 or 4 y-values in inner bracket with their h; allow recovery from bracket errors **M0** if any non-zero x-values used or if y-values used twice	eg $\frac{\text{their } 4}{2} \times \{1.45+1.04+2(1.56+1.27)\}$; signs must be consistent in 2nd alternative
				B1	all y-values correctly placed with their h, condone omission of zeros and/or omission of outer brackets	
			either 21.28 or ± 9.84	**A1**		or **B1** + **B3*** if area of 2 triangles and 3 trapezia calculated to give correct answer www The final **M1dep* A1** may then be earned. NB 2.9 + 6.02 + 5.66 + 4.62 + 2.08 or ± 1.7 ± 3.22 ± 2.62 ± 1.7 ± 0.60 with consistent signs throughout
			their 21.28 + their 9.84	**M1dep***		
			31.12	**A1**	ignore subsequent rounding, but **A0** if answer spoiled by eg multiplication by 20	

9	**(ii)**		*alternatively* $h = 4$ soi	 **B1**		
			attempt to find all y-values	**M1**	$y_{upper} - y_{lower}$	**M0** if values are added to obtain 0.60, 0.80 etc
			2.3, 2.32, 1.82, 1.34	**A1**	all y-values correct	
			$\frac{\text{their } 4}{2} \times (0 + 0 + 2(2.3+2.32+1.82+1.34))$	**M1**	shape of formula correct with 2, 3 or 4 of their y-values in inner bracket with their h; allow recovery from bracket errors **M0** if any non-zero x-values used or if y-values used twice	eg ½ × 4 × {2.3 + 1.34 + 2(2.32+1.82)}
				B1FT	all their y-values correctly placed, condone omission of zeros and/or omission of outer brackets	
			31.12	**A1**	ignore subsequent rounding, but **A0** if answer spoiled by eg multiplication by 20	or **B1M1A1** + **B3** if area of 2 triangles and 3 trapezia calculated to give correct answer www NB 4.6 + 9.24 + 8.28 + 6.32 + 2.68
				[6]		

10	**(i)**		$\left[\frac{dy}{dx}=\right] 4 \times 2 + 3$ or 11 isw	**M1***		
			9 = their $(4 \times 2 + 3) \times 2 + c$	**M1dep***	or $y - 9$ = their $(4 \times 2 + 3) \times (x - 2)$	
			$y = 11x - 13$ or $y = 11x + c$ and $c = -13$ stated isw	**A1** **[3]**	or $y - 9 = 11(x - 2)$ isw	
10	**(ii)**		$\frac{4x^2}{2} + 3x$	**M1***		
			$[y =] 2x^2 + 3x + c$	**A1**	must see "2" and " + c"; may be earned later eg after attempt to find c	
			$9 = 2\times2^2 + 3\times2 + c$	**M1dep***	must include constant, which may be implied by answer	
			$y = 2x^2 + 3x - 5$ cao	**A1**	allow first 4 marks for $y = 2x^2 + 3x + c$ and $c = -5$ stated	
			(1, 0) *and* (–2.5, 0) oe cao	**B1**	or for $x = 1$, $y = 0$ and $x = -2.5$, $y = 0$	**B0** for just stating $x = 1$ and $x = -2.5$
			$x = -\frac{3}{4}$	**B1**		
			$y = -\frac{49}{8}$	**B1**	–6.125 or − 6⅛	
				[7]		

10	**(iii)**		substitution to obtain [y =] f($2x$) in polynomial form	**M1**	f(x) must be the quadratic in x with linear and constant term obtained in part (ii), may be in factorised form	or their $x = 1 \rightarrow$ their 0.5 and their $x = -2.5 \rightarrow$ their $x = -1.25$
			$y = (2x - 1)(4x + 5)$ or $y = 8x^2 + 6x - 5$ or $y = 2\left(2x + \frac{3}{4}\right)^2 - \frac{49}{8}$	**A1FT**	must be simplified to one of these forms, **FT** their quadratic in x with linear and constant term obtained in part (ii)	hence $y = (2x - 1)(4x + 5)$ FT their x-intercepts from their quadratic in x with linear and constant term obtained in part (ii)
			$\left(-\frac{3}{8}, -\frac{49}{8}\right)$ oe	**B1** **[3]**	or **FT** their (both non-zero) co-ordinates for minimum point or their quadratic in x with linear and constant term obtained in part (ii)	
11	**(i)**		3×3^7 oe 6561	**M1** **A1** **[2]**	condone 1×3^7 or **B2** if unsupported	do not award if only seen in sum of terms of GP if **0, SC1** for 2187 unsupported
11	**(ii)**		valid attempt to sum a GP with $r = 3$ and $n = 15$ $\frac{3(3^{15} - 1)}{3 - 1}$ oe 21 523 359	**M1** **M1** **A1** **[3]**	eg $3 + 3^2 + \ldots\ldots + 3^{15}$ or **B2** if **M1M0** or **B3** if unsupported	must see at least first two terms and last term NB 7 174 453 implies **M1** from $1 + 3 + \ldots + 3^{14}$

11	**(iii)**		$\frac{3(3^n-1)}{3-1} > 1000000$ oe	**M1***		**M0** for working backwards **M0** if = or < used
			eg $3^{n+1} > 2000003$ or $3^n > \frac{2000000}{3} + 1$ www			
			correctly taking logs of both sides	**M1dep***	eg $\log 3^{n+1} > \log 2000003$ www or $\log 3^n + \log 3 > \log 2000003$ www; may be implied by next stage of working	at least one previous progressive interim step needed with no wrong working; **M0dep*** for $\log(3^n - 1) > \ldots$
			eg $(n + 1)\log 3 > \log 2000003$ or $n\log 3 > \log 2000003 - \log 3$			
			eg $n+1 > \frac{\log 2000003}{\log 3}$ and completion to $n > \frac{\log 2000003}{\log 3} - 1$	**A1**	without any wrong working	do not allow recovery from bracket errors at any stage
			$n = 13$ seen	**B1** **[4]**	**B0** for $n \geq 13$ or $n > 13$	
11	**(iv)**		valid attempt to sum a GP with $r = 2$ and $n = 15$	**M1***	if correct eg $2 + 2^2 + \ldots\ldots + 2^{15} = 65\,534$	NB 32767 implies **M1** from $1 + 2 + \ldots + 2^{14}$
			their 21 523 359 – their 65 534 21 457 825 isw	**M1dep*** **A1** **[3]**	with their 65 534 < their 21 523 359 allow **B3** for 21 457 825 unsupported
